

# GRID CONNECTION GROUP - WIND FARM

NEGOTIATING, DEFINING AND DEVELOPING WIND FARM CONTROL STRATEGIES, WORLDWIDE

Siemens Wind Power A/S is part of Siemens Group which is leading in technology in various areas.

Globally, Siemens Wind Power A/S has approx. 6,000 employees, and in Denmark approx. 4,000 employees. Headquarter is located in Brande, Denmark.

Siemens Wind Power A/S has achieved its strong market position through innovation, knowhow, and quality. The main activities are development, sales, and production.

Corporate culture is characterized by environmental consciousness, quality, reliability, innovation, and openmindedness.

The company is developing rapidly, and is expecting to increase the number of employees considerably in the coming years.

Siemens Wind Power is looking for a new colleague to join their Grid Connection Group in Engineering (R&D). The group is responsible for the development of control strategies, power system studies and technical support.

The daily work will be characterized by system analyses, building knowledge platforms, building network & interface with internal and external parties. Your challenging key task will be:

- Coordinating the test of the wind farm control functions
- Technical support and negotiations with our customers for onshore and offshore projects
- Performing system analyses including load flow, dynamic and harmonic studies
- Participating in international standard and grid code development groups
- Participating in negotiation of standards and grid codes with utilities and customers

Your success criteria will be to create effective wind farm strategies and grid code connections in onshore and offshore projects.

You are an Electrical Engineer and ready to strive for new and ambitious goals. You have at least 5 years of experience from a wind farm or power plant operation and extensive

knowledge of MV & HV power systems, SCADA & control systems, power flow analysis, transient & dynamic power system analysis, protection systems and turbines.

As a person, you are self-motivating and able to stay focused in hectic situations. You are an efficient networker with good communication skills and used to work in an international environment. You have a proven track record of combining your technological and creative skills, and you negotiate efficiently, with your positive and proactive approach.

Siemens Wind Power offers exciting challenges and international career opportunities in an innovative, global company at the leading edge of green technology. The working environment is open, inspiring and international, and provides great opportunities for personal and professional development. Salary and employment conditions are negotiated individually at an attractive level
