

R&D HARDWARE ARCHITECT

HIGH-TECH & INTERNATIONAL PROJECTS

Siemens A/S, Flow Instruments has 600 employees in USA, China and Europe, including 200 in Denmark. The company is part of Siemens, one of the world's largest electronics and technology companies with about 405.000 employees in 190 countries.

The company is experiencing strong growth and is very ambitious. It offers a dynamic, interdisciplinary and high-technology environment.

Siemens has a focus on innovation, and talented employees are the key to success. If you are seeking professional development or a career, Siemens offers the perfect setting to realize your potential.

SIEMENS

Siemens Flow Instruments is experiencing strong growth and is seeking a competent hardware architect to fill a newly created position in the competence centre on ALS in Denmark. In cooperation with the system and software architects, you will help exploit market potential by incorporating customer requirements and system design into products of the future.

As Hardware Architect, you lead the technical hardware design and development of advanced electronics, including complex analogue circuits and ASIC/FPGA design. You will also work with a broad range of disciplines such as requirements engineering, system design, SW, mechanical engineering, integration approvals etc., towards the optimal fulfillment of multidimensional requirements.

You will work on projects in global cooperation with colleagues in the USA, China and Europe and with external researchers to ensure a high level of reuse and follow up and architectural design in the development cycle (V model).

You have a senior background in electronics or mechatronics, combined with several years of experience working with industrial hardware design, and advanced analogue, digital and mixed signal hardware development, including ASIC design. It would be an as-

set if you have experience with Functional Safety (SIL).

You have strong analytical and logical skills, with a broad perspective and a holistic mindset. You are both politically and tactically adroit – and able to operate in an international setting with many competing interests. You have excellent communication and relationship-building skills and are able to motivate your colleagues to reach goals.

An attractive salary package will be negotiated individually, including training and talent development programs. Up to 40 days of business travel are expected annually. The company language is English, and German language skills would be an advantage.

Designing the architecture of the future is a strategic focus area. If you want to make your mark in this area, mail your application and CV in Word or PDF (in English) to: job@frontpeople.dk with reference code HWA711. Initial interviews will be held starting in mid-August.

For further information, please contact us on tel.: +45 7519 1938.
