As a part of continued strengthening of the Engineering organization in Siemens Wind Power A/S we are searching for experienced Lean/change management consultants. You will be responsible for numerous activities and you will be involved in strategic analyses and initiatives.

Your particular area of responsibility is leading improvement projects, training managers – including “train the trainer” programs – and employees in Lean tools and techniques as well as participation in the continued development of the Lean strategy.

As part of the Lean team, you will be appointed as project manager on various lean activities with continuous reporting to the management. Furthermore, you will be anchoring improvements and collected experience into development projects and the organisation.

Your ability to act as sparring partner to the interface actors of the Engineering organisation, Global Supply Chain and the administration concerning improvement projects is very important.

You will be filling an important and demanding position, where you will be measured on your ability to create relations and networks across the organization as well as your ability to mature lean thinking and mind setting and thus ensuring optimization of core processes and core business.

The ideal candidate has several years of experience from large change management projects, IT and/or the lean area and preferably comes with a consultant background.

You operate comfortably at all levels and demonstrate excellent communication skills – you are a natural networker. You have exceptional analytical skills. As a project manager you are confident – plans and deadlines are reached on account of your coaching and motivating leadership. You must be able to handle highly complex projects and situations, and you are proficient in English – written and oral.

Siemens Wind Power offers exciting challenges and international career opportunities in an innovative, global company at the leading edge of green technology. The working environment is open, inspiring and international, and provides great opportunities for personal and professional development. Salary and employment conditions are negotiated individually at an attractive level.
