SIEMENS

Siemens Wind Power A/S wishes to strengthen the management of its certification and approval area. The department is part of the Product Integrity department in Engineering. You will be manager for seven people, and responsible for certification and approval of newly developed wind turbines and wind farms - worldwide.

You will define a strategy for certification and implement the concept and standard of programs. Your management task will be to expand the current team, consisting of competent project managers and experts. You will take part in new product development projects and collaborate with colleagues in the Engineering department as well as other business units and external authorities.

The success criteria will be good management, team skills and motivation, transparent project and milestone plan, certification and documentation quality and meeting agreed targets.

You are a Mechanical, Electrical or Marine Engineer with at least 5 years experience from a technology-intensive international project-driven industry, combined with 1-2 years experience in industrial construction certification and approval

procedures. Experience leading intercultural teams and project managers and technical experts will be an advantage.

As a person you are ambitious and as a manager you are able to take charge of the process of maturing and improving the "certification culture". You are a people manager, quality and result oriented, with excellent communication and relationship building skills. You are agile and can handle significant growth, development and changes.

You will be a part of one of the biggest development organizations in Denmark, with great opportunities for professional sparring and career development.

Salary and employment conditions are negotiated individually at an attractive level.
