

POWER SYSTEM DESIGN ENGINEER

DESIGN OF ELECTRICAL EQUIPMENT FOR WIND POWER PLANTS

Siemens Wind Power is one of the world's leading manufacturers of wind turbines.

With headquarters in Brande in central Jutland, Siemens Wind Power currently employs over 4,000 people in Denmark.

The company is continuing to expand its strong market position through innovations such as direct drive generators for the next generation of wind turbines.

The corporate culture is characterized by environmental consciousness, a close eye on quality, reliability, innovation and open-mindedness.

Siemens Wind Power is looking for a new colleague to join the Electrical Turnkey Team in Engineering (R&D). The group is responsible for the technical roadmap, technical planning, design, project execution and technical support across the Siemens organization as well as to external parties.

You will report to the team leader of the Electrical Turnkey Department and you will be responsible for specifications and designs of electrical equipment for turnkey wind power plants.

The daily work will be characterized by system analyses, building knowledge platforms, building network & interface with internal and external parties. Your challenging key tasks are specification and designs of electrical equipment for turnkey wind power plants, including:

- Main Transformer
- Substation
- Switchgear
- MV & HV equipment
- Capacitor banks
- Shunt reactor
- SVC
- FACTS

Furthermore, you will provide the technical support on specialist level and participate in the negotiations with strategic suppliers for onshore and offshore turnkey projects worldwide.

Your success criteria will be a toolbox that includes a modularization of the Siemens Turnkey solution - on the electrical infrastructure.

You are an Electrical Engineer and ready to strive for new and ambitious goals. You have at least 5 years of experience with power system design and operation from e.g. utilities, consultancy companies or wind farm/power plant developers.

As a person, you are self-motivating, proactive and dedicated to meeting plans and deadlines, and you stay focused in hectic situations. You demonstrate critical discernment, and you are quality conscious and result oriented. You can handle interfaces with numerous parties and possess good communication skills.

Siemens Wind Power offers exciting challenges and international career opportunities in an innovative, global company at the leading edge of green technology. The working environment is open, inspiring and international, and provides great opportunities for personal and professional development. Salary and employment conditions are negotiated individually at an attractive level.
