SIEMENS

Siemens Wind Power product portfolio is divided into programs which are maintained and developed by a program team. The objective of the team is to ensure that Siemens Wind Power products are technically and commercially competitive in the market. Siemens Wind Power 2,3 MW Wind Turbine is one of the market leading Wind Turbines.

As Program Manager for 2,3 MW Wind Turbines you will report to the Director of Program Management and you will be leading a team of two senior specialists.

Key tasks will include:

- market and customer driven product reviews/designs
- cost optimization
- assortment development and pruning
- product introduction planning
- portfolio and product lifecycle planning
- product road mapping and documentation

Customer contact, networking and interaction with all business units in Siemens Wind Power will be other important elements in your job.

Key success criteria include ongoing minimization of cost of energy for the 2,3 MW Wind Turbine, efficient people management and relationship building.

You have a degree in engineering combined with a commercial degree - or a degree in commerce combined with technical insight. You have a proven track record within product management, customer driven product development, cost minimization, and team management. Candidates with experience from R&D function in a large international, technological manufacturing and knowledge company will be preferred.

As a person you have strong analytical/logical skills and a broad perspective. You thrive in an international environment, are customer oriented and have excellent communication and relationship building skills. You are a people manager, structured, proactive and result oriented.

Siemens Wind Power offers exciting challenges and international career opportunities in an innovative, global company at the leading edge of green technology. The working environment is open, inspiring and international, and provides great opportunities for personal and professional development. Salary and employment conditions are negotiated individually at an attractive level.
