

SYSTEM ARCHITECT

CENTRE OF COMPETENCE – BEING PART OF THE BUSINESS

Siemens A/S, Flow Instruments has 600 employees in USA, China and Europe, including 200 in Denmark. The company is part of Siemens, one of the world's largest electronics and technology companies with about 405.000 employees in 190 countries.

The company is experiencing strong growth and is very ambitious. It offers a dynamic, interdisciplinary and high-technology environment.

Siemens has a focus on innovation, and talented employees are the key to success. If you are seeking professional development or a career, Siemens offers the perfect setting to realize your potential.

SIEMENS

Siemens Flow Instruments is experiencing strong growth and is seeking a competent system architect for the competence centre on AIs in Denmark who can help exploit market potential by incorporating mega trends and customer requirements into products of the future.

You will have rich opportunities to influence flow measurement technologies and products of the future. You are responsible for designing future-proof systems and flow products, including top-down system analysis of advanced measurement requirements and system design, including definition of interfaces between SW, HW and mechanical components.

Your job will involve close collaboration with Product Management on future customer and market needs and definition of product requirements, covering a broad range of technical challenges, such as standards, approvals, design-to-cost and manufacturing, as well as system integration and testing.

The success criteria for the position is to use your discernment to influence the business and ensure reuse and consistency across the complete line of flow technologies.

You have a senior background in Mechatronics, Electrical Engi-

neering, Computer Science or similar, and extensive experience with business processes and with design and technical responsibility in complex development projects.

You are quality-oriented, have excellent communication and relationship-building skills and are able to motivate your colleagues to reach goals. You have strong analytical and logical skills, with a broad perspective and a holistic mindset.

An attractive salary package will be negotiated individually. Up to 30 days of business travel are expected annually. The company language is English, and German language skills would be an advantage.

Designing the architecture of the future is a strategic focus area. If you want to make your mark in this area, mail your application and CV in Word or PDF (in English) to: job@frontpeople.dk with reference code SYSA711. Initial interviews will be held starting in mid-August.
