SIEMENS

Siemens Wind Power A/S is currently working on an extensive CMS project. It is an IT project aiming for consistent dynamic publishing of documentation. You will have the opportunity of influencing the project and in the end the way we organize knowledge and work processes.

You will be a part of the CMS project team which area of responsibility is to compose structured text for dynamic publishing of documentation for pdf, HTML, web etc. The team is also responsible for editing of the factual contents of the manuals, preparation of check lists and other instructions and for training of the departments other employees during the implementation phase.

Your primary tasks are to analyze and process existing contents and make them match the author guideline and to edit and arrange existing contents using tags and metadata in the XML editor XMetaL. Other tasks are evaluation and editing of contents in cooperation with the service department as well as categorization and processing of photos in Photoshop and preparation, registration, managing and maintenance of documents.

The Service Documentation team works closely together with the service department, Engineering and other business units as well as external suppliers. It is therefore important that you are capable of translating complicated technical instructions to an easily comprehensible language targeted for the specific group of recipients.

You may come from a background as production technologist, electrician, machine technician, technical assistant, a science graduate with a technical interest, librarian or.... It is, however, a requirement that you have experience of building databases, preferably in CMS systems. Project experience from major IT projects, knowledge of the XML editor XMetaL and HTML as well as solid technical insight would be an advantage.

You have a comprehensive view of things; you think logically and work meticulously with details. You are extrovert and like to cooperate in and outside of the company and being a coordinator and project manager comes naturally to you. Others would characterize you as proactive and persevering and you make sure that you as well as "customers" deliver as agreed.

Siemens Wind Power offers exciting challenges and international career opportunities in an innovative, global company at the leading edge of green technology. The working environment is open, inspiring and international, and provides great opportunities for personal and professional development. Salary and employment conditions are negotiated individually at an attractive level.
