

# TEAM LEADER

DEVELOPMENT AND DESIGN OF EQUIPMENT FOR TRANSPORTATION AND INSTALLATION OF WIND TURBINES

Siemens Wind Power is part of Siemens Group which is leading in technology in various areas.

Globally, Siemens Wind Power has approx. 5,700 employees, and in Denmark approx. 3,800 employees. Headquarter is located in Brande, Denmark.

Siemens Wind Power has achieved its strong market position through innovation, knowhow, and quality. The main activities are development, sales, and production.

Corporate culture is characterized by environmental consciousness, quality, reliability, innovation, and openmindedness.

The company is developing rapidly, and is expecting to increase the number of employees considerably in the coming years.

**SIEMENS**

Siemens Wind Power is growing significantly and is looking for a manager within the competence area "Transport & Installation", currently counting 12 very skilled employees.

You will refer to the Head of Towers and Transportation and be a member of the area's management team. Besides people management your responsibilities will include design and development of equipment used in connection with the transportation and installation of wind turbines for all regions Worldwide.

"Transport & Installation" is part of engineering / R & D and will interface with both development of new wind turbines and operational units plus support functions, nationally and internationally.

Your primary tasks will be within management, including strategic planning of organization and execution. Other areas will be development and implementation of equipment and concepts for the transportation and installation of wind turbines onshore and offshore. You will participate in multi-functional project teams, and you will be responsible for "tying the ends together" between R&D engineers, transportation and procurement.

Your challenge will be to handle large product parts and ensure flawless equipment for transportation and installation solutions.

Furthermore, you must ensure a motivated and competent team, and the department it is expected to grow significantly in the coming year.

You are an experienced and strategic manager with a background in engineering. You have a proven track record within handling and construction of large product parts from projects or installation. You are familiar with international organizations, engineering interface and collaboration across the value chain. Corporate language is English.

As a person you are confident and able to grasp complex projects and situations. You are an engaging and inspiring leader who is outgoing and development oriented. You move freely between strategic planning and creative loops when solving complex and practical issues.

If you are motivated by a challenging task in a development oriented and international environment, please send your application to [job@frontpeople.dk](mailto:job@frontpeople.dk) mrk.: TI610. If you have questions, please contact us at +45 75 19 19 38
