

# .NET SOFTWARE DEVELOPER

## INFLUENCE ARCHITECTURE AND PRODUCT - INTERNATIONAL DEVELOPMENT PROJECTS

Our client is an international company and a leading player in the fields of research, development and production within a broad spectrum of industries.

The company is the market leader in specific areas and its ambition is to supply the most energy-efficient and effective quality products for indoor climate comfort.

Our client wishes to strengthen the development of software for its main products, which are advanced and intelligent high-end products that have a positive impact on climate and energy consumption. The R&D/Competence Centre in Vejle employs 80 people and is at the cutting edge of control systems and software development. It aims to be a market leader in products and technology.

You will contribute to development projects involving different cultures and professional fields and you will be responsible for updating and ongoing development of the platform (WinCE) for "the next generation of residential climate control", where the possibilities are endless. You will be part of a dynamic and highly skilled team of 15 people, 9 of whom specialise in the development of control technology and software.

You will become involved in a wide range of tasks and projects and you will have plenty of opportunity to influence your work and those around you. Your primary tasks will be drafting requirements specifications, programming, software testing and participating in ambitious projects that have a broad interface.

You are a qualified engineer with a background in software and/or electronics, computing science or other relevant qualifications, and you have documented experience with .NET, C#, UML, OOA/

OOD as well as practical programming experience. You also have experience with testing and integration of software. You may also have experience with version control systems, network protocols for web services and cross platform development for smart devices (iPhone/Android/WP7).

You see the big picture, are curious, outgoing and analytical. You want to bring your knowledge into play, and you focus on development and advancement for the benefit of both customers and the environment. You are able to objectively assess yourself and others and you are target-driven and results-oriented without losing focus. Up to 30 days of annual business travel is expected.

This position offers attractive salary and employment terms. The corporate language is English.

If you seek professional challenges and want to influence "the next generation of climate control", then send your application and CV to [job@frontpeople.dk](mailto:job@frontpeople.dk), marked: "NET711". Candidates will be interviewed in calendar weeks 33 and 34.

If you have any questions, please contact us on +45 75 19 19 38.
