

# LIGHTNING PROTECTION & EARTHING SYSTEMS

DESIGN & DEVELOPMENT, TECHNOLOGY DEVELOPMENT IN A FAST GROWING INDUSTRY

Our client is part of an international group that is leading in technology in various fields.

In Denmark, the company employs about 4.000 employees and their headquarters are located in the middle part of Jutland.

The company has achieved its strong market position through innovation, know-how, and quality. The main activities are development, sales, and production.

The corporate culture is characterized by environmental consciousness, a close eye on quality, reliability, innovation, and open-mindedness.

There is a constantly ongoing effort to develop the competencies of the employees, among other things through project work, supplementary training, and stationing.

The company is growing and developing. They are seeking an engineer for tasks connected to designing and development of lightning protection and earthing systems.

You will be responsible for the further development and documentation of external as well as internal lightning protection systems and earthing systems.

The position is a part of the Control Systems department, and you will join a team of 15 competent colleagues.

An interesting project pipeline awaits you and your everyday work will encompass great variety. You will experience a high level of interaction and cooperation across different fields of operation. The key tasks are focused around the following:

#### Design & development:

- external as well as internal lightning protection systems
- earthing systems
- test needed to verify the design
- tools and equipment for monitoring of lightning strikes in the turbine

#### Documentation:

- which has to be available for sales and projects regarding lightning protection and earthing
- needed for manufacturing
- follow-up in manufacturing to ensure that the procedures and work instructions are followed

Task force for failure analysis / troubleshooting.

Participation in international as well as national working groups for standardization of lightning protection and earthing.

You are an electronics engineer, preferably with work experience as an electrician etc. You have experience with lightning protection systems and it would be of great value should you come from a company that uses a lot of technology.

Send your application to [job@frontpeople.dk](mailto:job@frontpeople.dk), marked LP0309.
